

SATURDAY, SEPTEMBER 24, 2022

11AM - 3PM

Denver East High School

1600 City Park Esplanade

Denver, CO 80206

www.energydayfestival.org

ABOUT ENERGY DAY COLORADO

Consumer Energy Alliance and Consumer Energy Education Foundation (CEEF) hope you'll join them for this year's festival that will host energy and STEM related exhibits, demonstrations, and interactions with industry experts with the purpose of furthering the interest of students already interested in energy, conservation, and STEM, and sparking the interest in new students that have yet to discover how much fun and how many opportunities this world holds!

Colorado is the major energy hub in the West, home to major oil & gas, solar, and wind energy companies. Additionally, the state is a research center for the energy industry, hosting not only the National Renewable Energy Lab (NREL), but also home to many of the nation's leading collegiate programs, professors, and research facilities including University of Colorado, Colorado State University, and Colorado School of Mines.

In addition to our focus on energy education, Energy Day Colorado has become a leading event to introduce and showcase additional STEM activities for Colorado students. FIRST Robotics has become a major part of the festival offering competitions and demonstrations from over 30 high school robotics teams from across the state. In 2019, the event honored Kendrick Castillo, a student who had a love for robotics, but was tragically the victim of a school shooting in Highlands Ranch. The event plans to continue honoring his legacy and his love for science through continuations of the "Kendrick Castillo Memorial Robotics Tournament" in 2022 and for years to come.

WHY BE A PART OF ENERGY DAY COLORADO?

Help students fall in love with science at an early age!

- Energy Day Colorado has activities for students of all ages.
- Science in the classroom is fundamental, but hands-on science can be even more influential.
- One interaction or conversation with a real-life scientist can ignite a new passion in a child.

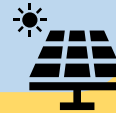

Find your future workforce!

- Many students who attend Energy Day Colorado show signs that they are headed towards college programs in the energy and STEM industries.
- Your employees and representatives are the perfect people to provide insight into how to get started working in the industry and how rewarding it can be.

Get your products out in front of students and parents alike!

- Where there are students, there are parents!
- Though there is a large focus on students at the festival, hundreds of parents will be in attendance.
- This is the time to show off your products and services to many household decisionmakers, while also doing good by their kids.

Represent your industry!

- It is the festival's goal to have a wide range of energy, STEM, as well as community sponsors and exhibitors.
- Get in front of 5,000 people.
- Local media will be onsite covering the event, as well as social media exposure both from the event and attendees.
- Help advance education about the industry and its goals.

2022 SAFETY PROTOCOLS

COLORADO
Department of Public
Health & Environment

DENVER
PUBLIC HEALTH &
ENVIRONMENT

CEEF, CEA, and its event production team will be following Colorado's COVID state event guidelines.

In addition, we will be working directly with Denver's Office of Special Events to ensure all city safety protocols are in place for the event.

Research has shown that outdoor activities and events have a lower risk for COVID spread. All aspects of the event will be held outdoors.

Additional onsite health and safety elements will be implemented to ensure a clean and safe event site.

All 2022 plans have focused on guest, exhibitor, and staff safety during load-in, the event itself, and load out.

Final safety rules & regulations will be announced closer to the event to ensure they comply with the latest city & state regulations.

WHO IS KENDRICK CASTILLO?

Kendrick was a student at the STEM School Highlands Ranch High School, and a senior leader on the FIRST Robotics team 4418 STEM Impulse. In 2019, Kendrick intervened in an active shooter situation in his classroom and was shot and killed while defending and protecting his classmates and teachers. His heroic actions saved many lives, and today his friends in the FIRST Robotics community honor and remember his strength of character and dedication to service. This tournament was renamed in his honor, to carry forward his legacy within the FIRST Robotics community and beyond.

Not seeing an option that fits for your organization or budget? Not sure you have the personnel to be onsite?

If science has taught us anything, we know not everything fits in a box!

If you are not seeing a participation option that fits your desired onsite activities or your budget, please do not let the conversation end here. Contact one of our team members and we can discuss in more detail if there is a way to meet all our goals.

In addition, if you think your organization is a good fit to be involved in the event, but onsite staff may be an issue, reach out as we might be able to partner you with a local non-profit or volunteer group that can help man your booth.

If you are interested in becoming a sponsor or exhibitor for Energy Day Colorado 2022, please reach out to Lindsey Barela, Sponsorship & Exhibitor Sales, EnergyDayRep@ConsumerEnergyAlliance.org or (303) 884-7232.

Many companies can pull from different internal budgets since this event may fall under marketing, education, recruitment, and community. In addition, though not anticipated, if the event should not be able to take place in 2022, your sponsorship will be credited to the 2023 event or may be eligible to be transferred to other CEEF events.

CEEF has additional opportunities on how you can get involved with bringing the world of energy and STEM to kids across the country. Contact Aimee Flores at aflores@ceef.org to learn more about:

- Energy Day to Go
- CEEF Summer Camp
- And more!

On behalf of the CEEF and CEA Board of Directors, Community Partners, Sponsors, Students, Parents and Educators who are working together to support STEM education and outreach thank you for your support!

Proceeds for the event benefit Consumer Energy Education Foundation (CEEf), a non-profit organization focused on developing educational support materials, activities, resources, and information about career opportunities in energy and STEM fields for various programs, educational organizations, and events nationally. CEEf works to engage in and support activities and programs that motivate, inspire, and improve students' understanding of the various career opportunities that are available to them if they follow a STEM path.
